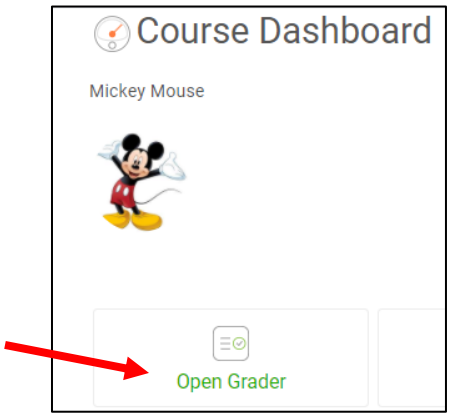
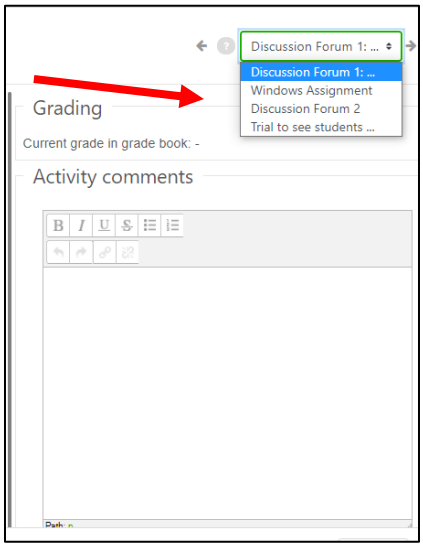
Print a feedback file from your instructor

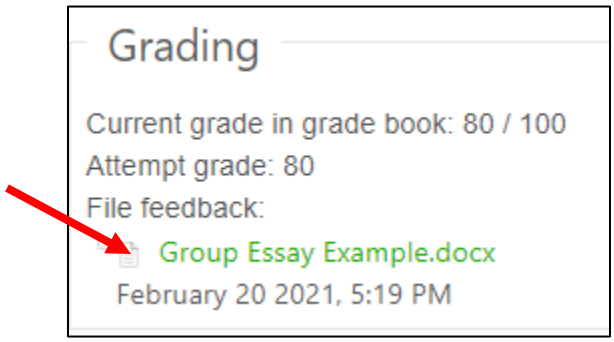
If your instructor has graded a document you submitted as an assignment and sent you the document back with comments on it, here are the steps needed to print that document from your Open LMS/Moodle course.



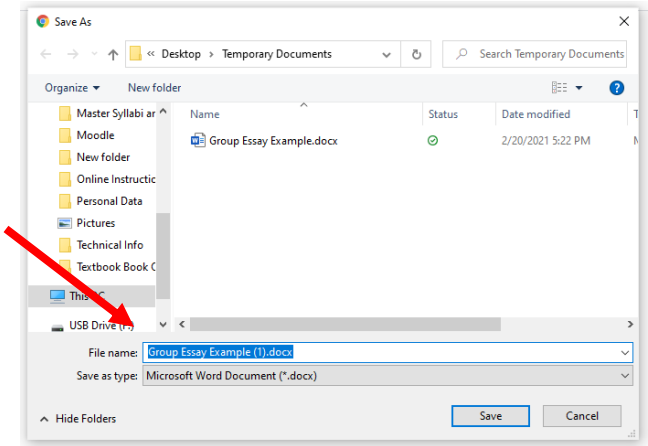
Step 1: Click the **Course Dashboard** then click **Open Grader**



Step 2: Click the drop-down menu and select the assignment name.



Step 3: Click the Feedback file.



Step 4: Generally you will have to save the file before you can open and print it.

Pay attention to where you save it so you can find it. If you aren't given the opportunity to choose where you save it, then it will probably be in the Downloads or Documents folder on your computer.
