

CLARENDON COLLEGE

ANNOUNCEMENT OF AVAILABLE POSITION

Job Title: Clinical Simulation Lab – Nursing Faculty

Reports to: Director – ADN Programs

Position Overview:

The clinical/simulation lab faculty coordinates the day-to-day activities of the nursing lab including scheduling/ lab set-up, and management of both low and high fidelity simulation equipment for the ADN Bridge/Traditional program and the LVN program. The Clinical Simulation Faculty is expected to become proficient with the routine operation and maintenance of all simulation equipment and on the use of simulation software and required AV scenarios. This position will be trained to provide both to nursing clinical lab experiences, and simulated clinical learning experiences.

POSITION REQUIREMENTS:

Education:

Bachelor's Degree in Nursing; Preferred Master's Degree in Nursing.

License Required:

Valid unencumbered Texas Registered Nurse License. Valid Texas Driver's License. Basic CPR certified.

Work Experience:

Minimum of three years' work experience in an acute care setting.

Computer Skills:

Proficiency in word processing, spreadsheet, and presentation software applications.

Physical Requirements:

Work is performed in a standard office and lab environment.

Subject to sitting, standing, bending, walking, reaching, kneeling, and stooping.

Occasional lifting of objects up to 30 pounds and push/pull minimum of 50 pounds.

Exposure to hazards related to working in medical waste/sharps environment.

Potential for exposure to contaminated blood and/or body fluid.

Duties and Responsibilities:

Actively engages in teaching groups of students through demonstration, practice, and assistance.

Interest in teaching nursing skills and simulated patient care scenarios using low/high fidelity simulation.

Responsible for appropriately setting up all equipment for specific educational courses.

Assist students in the application of the nursing process to include assessing, planning, implementing, and evaluating nursing care.

Demonstrates ability to facilitate scenarios according to evidence-based standards and guidelines.

Uses evidence-based tools and measures to evaluate the students' clinical learning.

Assist nursing faculty/staff in the development, implementation, and integration of simulation activities for the students.

Facilitates student learning in the advancement of basic nursing skills to resolving simple to complex patient situations via simulation scenarios.

Assist students with critical thinking, clinical judgment, problem solving, using reflection, de-briefing, active listening, and other clinical teaching strategies.

Maintain all lab equipment including both low/high fidelity simulation equipment and recommending replacements as needed.

Conducts basic preventative maintenance on simulation equipment both before and after scenarios.

Anticipate necessary supplies required in advance for lab presentations.

Maintains the clinical/simulation lab as a clean, safe, and optimal learning environment.

Maintains proficiency in existing and emerging technologies and training activities.

Perform other duties as required.
